In this 'rapidly' changing world, one of the biggest concerns is keeping up with the new and advanced technologies today. It is a challenge that continues to exist and grow in the competitive industries. Ironically, ways to send out information have not been up to date with the changes that are happening in this world.

The concept of WinCAM was derived from the need to develop an easier method of learning and training the complex software applications in use today. WinCAM provides corporations to reach clients effectively by minimizing the cost and maximizing the productivities. It also acts as a tool that can help educators to teach students with minimal efforts as well as increasing the effectiveness in their method of teaching. With this basic concept in motion, WinCAM delivers promising and guaranteed results.

WinCAM is world's first interactive user-friendly program that has been developed to transmit information in the manner that is fast, easy and effective. WinCAM has been designed to record everything on the computer screen with the help from our patented recording engine that makes the recording process much smoother and more efficient. WinCAM's Interactive Multimedia service edition has built-in features, allowing users to not only view but to participate interactively with the program. It contains features such as special effects, captions, sound effects and other interactive tools that can be easily inserted for customized results. It also provides easy to use frame-by-frame editing and playback tools, in other words, it's like all in one TV and VCR with powerful editing options. All of these amenities enable you to create high quality and powerful contents by making WinCAM to be one of the most superior programs out there in the world.

- Mirion Systems Patented ICC (Intelli Comparing and Capturing) technology
- World's first Interactive feature and Multi-platform support
- User-friendly interface and easy recording procedure using Recording Wizard
- Various type of Sound Effects support
- Various file format support
- Powerful frame editing and object editing tools
- Over 1000 clip-arts included
- Multimedia help file available
- Auto-update feature
- Many different versions available
- Multi-language support

➤ Applications & Prospects

- Application

-On-Line Tutorial/Lecture

WinCAM has been determined to be one of the most effective ways to educate students, whether it is taught in a traditional or a virtual setting. By using WinCAM, educators can eliminate or avoid re-occurring frustration and repetitiveness of making same teaching materials over and over again. With increasingly large number of students and teachers going online for educational purposes, creating [interactive multimedia contents](#) using WinCAM makes it a perfect solution to their problems. More importantly, with WinCAM's [streaming features](#), you will be able to broadcast contents over the Internet.

This allows you to be in more control over your contents

-Help file for any applications

By using WinCAM, you will be able to replace your current text based help files with on-line multimedia developed and enhanced help files for specific applications. These rich multimedia help files will provide end users with diverse variations of helpful information and give power to your application. [To view WinCAM multimedia help files, Click here](#)

It is very easy to update.

-Presentation

WinCAM contents let you make impressive and error-free presentations in any situations. It has capabilities to enhance the conversion of existing manuals and brochures to digital format. The usage of these applications can be recorded in full motion to demonstrate its unique features. WinCAM is also utilized for business and educational purposes to aid in their presentations. - Prospects

- Academic:

Contents created using WinCAM offer students and potential clients to learn interactively. Unlike the usual traditional setting, interactive WinCAM serves as an exciting alternative method that everyone enjoys. This resulting success will eventually win over those existing books and traditional methods learning and teaching.

- Economical:

In commercial and educational sectors, reducing cost and being efficient are goals that eventually lead to success. By using WinCAM, the reduction in TCO (Total Cost Ownership) allows limited resources to be maximized to achieve success in this competitive world.

- Technical:

In general, screen capturing technology is being developed slowly but WinCAM has already been caught up with new technologies to survive and stand out from the crowd. With WinCAM's ability to capture screens in full motion, it will be one of the world's most powerful program known in this industry.

There are [different WinCAM editions](#) available for your particular needs. Whether you are targeting a small group or a worldwide market, WinCAM will help you to achieve your goals more sufficiently.
